### *Green Score*

- Lead Councilor: Tseng
- Timeline:
  - Include as part of zoning reform discussions
- Description and goals:
  - Points-based system whereby developers must meet a specific set of points, awarded based on the integration of natural systems (e.g., plantings, trees, green roofs, green walls, etc.)
  - Encourage new development and redevelopment to mitigate the urban heat island effect through the incorporation of green space and natural systems
  - Encourage new development and redevelopment to capture, infiltrate, and evapotranspire more stormwater on site to reduce stormwater volume, flood risk, and stress on the stormwater system

- Encourage new development and redevelopment to meet healthy soil standards, which ensure soil in the city can better infiltrate stormwater, sequester carbon, reduce erosion, and support ecological health
- Consider standards that would require developments to meet one of four options: 1) Leaving native soil and vegetation undisturbed and protecting it from compaction during construction; 2) Amending existing site topsoil or subsoil on site to meet specifications; 3) Removing and stockpiling existing topsoil during grading, reapplying, and amending the soil in place to meet specifications; or 4) Importing a topsoil mix, including compost, to achieve an appropriate pH and sufficient soil organic matter and depth

## Oversight and Engagement
