

**Roundtable #2 - Committee of the Whole Notes - June 3, 2020 - 4 PM -
via Zoom**

Mayor - welcomed everyone - 4:01 PM -Meeting today to gather collaborative input for fall 2020 scenarios

Roll Call 7-0

Mayor : We have 4 language based breakout groups:

Ghislaine Pinto - Portugese - (1)

Andree Pierre-Paul - Haitian Creole

May Abuhasan - Arabic

Jessie Reinold - Spanish

(*I am in SC Member Ruseau's Breakout Room)

Member Ruseau led discussions on:

Instructional Delivery - Thoughts? - On how many times/how often the student was interacting with teachers (live), Social Emotional Learning - use resources provided?, Curriculum & Online content, and Professional Development - Distance learning assistance - additional training for parents, teachers, students

Mayor - Welcomed everyone back - We had 288 participants. Wonderful!

Mayor's Group - main discussion - online live sessions, it helps a lot of parents/teachers to have a consistent schedule - smaller group sessions - important to have connections with teachers/fellow students - high school students - sleep in - later classes are better - SEL - students definitely need it - very well done

Member McLaughlin Group- equity, consistency issues - rules change halfway to $\frac{3}{4}$ of the way through was difficult - talking in 2 different languages - consistency across teachers/grades & families - remote learning night - mindfulness or exercise group for kids to connect socially - record meetings - keeping kids together -

Member Kreatz Group - hybrid of live and taped lessons - check ins from teachers increased over time - SEL - whole group class groups, helpful for socialization - social check in - offered games and learning at same time (SEL) - good balance - professional development for parents for computer programs maybe in Aug - students need it too - parking lot question - vocational school, what will happen next year regarding their trades

Member Van der Kloot Group - equity vs. inequity ? Not all students would check in - live zoom meetings were great for SEL yet sometimes chaotic and added to student stress - maybe zooms could be shorter - recorded lessons would be helpful - schedules - lack of schedule or being incomplete. Robo calls weren't specific, which child? - Most kids don't know how to use gmail & how to organize it into a schedule. Parent/teachers - smaller groups best - one thing to do this when you know your students, will be harder when start with new classes in fall - teacher provided a closed FB page which was helpful

Member Ruseau Group - Very interesting point, that when there is a recorded class, the student that needed additional help, it was very helpful - very different needs at every grade level, and every student has very different needs - breaking classes into smaller groups, especially younger grades was very helpful - 1-1 special ed - two people teaching at once on zoom difficult - area that might need focus - focus on SEL for older students - programs won't be keep giving us to us free - we will have to figure costs that we have not planned for - critical - too many logins - not a fan of google meetups - finding ways to share content delivery -

Member Mustone Group- no consistency amongst students/grades - via Mr. Downs - small groups vs larger groups were more effective - zoom sessions were more official - SEL - first and foremost on more teacher/parents minds - get these resources for them - Online - software Lexia and Plato - expensive, but very useful - for information and instruction

Member Graham Group - spoke about similar issues - need for a consistent platform - teaching things that we don't have to teach usually - making connections with new students in Sept via zoom would be difficult - teachers should be authority about what should happen, rather than parents - opportunities for communication, around rules of engagement for next year, if it happens, clearly laid out for those involved - teach virtual learning skills - what else to teach unique to virtual platform - Mr. Teixeira - recorded teaching sessions are important so they are available at another time, and making sure that everyone has access to technology and wifi - Dr. Chiesa - finding a way to support elementary learners vs. middle/high school - while parents are also working

Dr. Edouard-Vincent Group - Thank you everyone - recurring theme of increasing face to face time with students daily - SEL - help children to adjust, see the teacher and the classroom - online teaching vs. online resources - online teaching by teachers - online resources to develop computer skills for parents/students - very appreciative of feedback that has come in - a lot of conversations about way roundtables are constructed - nearly 300 participants - we can't tell who is elementary or secondary - a challenge to place everyone in similar breakout rooms - our specialists did a lot of hard work to engage the students -

Ms. Pinto - One parent who has 2 students at MHS - she agreed pretty much with everything already mentioned. Live is best, yet scheduled later as high school students wake up late. Also having it recorded for viewing later is important.

Ms. Pierre-Paul - no one in room

Ms. Abuhasan - no one in room

Ms. Reinold - no one in room

Mayor - it is 5:30 PM

Member McLaughlin - I have a concern that the translated sessions are not well attended - how might we engage these communities better? Marginalized families, students with disabilities, etc. Please share ideas at info@medford.k12.ma.us

Mayor - next Wed / June 10th at 4 PM - hope to have just as much participants & will try to figure out how to categorize into elementary, secondary breakout rooms

Dr. Cushing - It might be helpful, to indicate beside your name, the breakout room you'd want to be placed in. Or we could register participants, but then I'm not sure if I could still include people that day who did not register

Motion to adjourn by Member McLaughlin, seconded by Member Ruseau

Roll Call - 7-0 - Meeting adjourned 5:32 PM
