WESSLING ARCHITECTS

JAMES MACKEY, AIA

Principal

[redacted]

James is a registered architect with over 30 years of experience in architectural practice. He is a building enclosure consultant with extensive experience in evaluation and diagnostics of building envelope failures on existing historic structures. He is a specialist in the preparation of appropriate details to repair ongoing deterioration and prevent future envelope failures in a wide range of building materials and systems, representing the last 350 years of building construction history.

He has extensive experience working on a variety of projects scopes, building types, interior and exterior design issues, and exterior envelope restoration challenges. His experience includes existing buildings surveys, programming, schematic design, public hearing presentations, detailing and construction documentation, consultant management and coordination, specifications writing, private bidding, value engineering, construction administration, resiliency studies, and participation on both domestic and international project teams. Working within the commercial, industrial, and residential markets, he has successfully completed projects with construction budgets that range from $100k to $50 million dollars.
